Siding

FOR A

**Greener
Environment**

EMCO Building Products steel siding allows you to treat yourself to the beauty of wood, the durability of steel, and the maintenance freedom you deserve.

EMCO Building Products steel siding is made in the U.S.A. from the finest materials to ensure the most dependable siding available in the siding industry today. Our steel siding is more durable than vinyl, aluminum, wood or fiber cement. EMCO Building Products steel siding is tough because it's made of a heavy gauge steel, and finished with a durable, long-lasting coating that resists cracking, peeling, flaking, blistering, chipping, fading and so much more.

EMCO PRESERVE™ **STEEL SIDING**

The EMCO Preserve™ Steel Siding & Accessories collection is available in a full range of colors and profiles to give you design flexibility. With colors like Desert Sand, Wedgewood Blue and Northwood and distinct profiles like our traditional double 4 inch and our popular double 5, you'll easily be able to create an exterior for your home to be proud of.

Weatheredwood™ **Two-Tone Woodgrain Steel Siding**

The EMCO Weatheredwood™ Steel Siding & Accessories collection replicates nature in terms of color and texture. Its unique color palette consists of a variety of two-tone shades that create the look of naturally stained cedar in a maintenance-free product.

The Finishing Touch

Complete your color scheme with EMCO Building Products' coordinating soffit, fascia and rain-carrying systems. Our home exterior accessories are color coordinated with all our products, and offer the most attractive and functional system on the market today. Matching or contrasting accents will add a unique finish to your home.

EMCO Building Products
enhanced with

Home Protection

EMCO Building Products' world class coatings are harder, more scratch and stain resistant, and are backed by the most comprehensive warranties in the industry. Our tough proprietary finish, enhanced with a DuPont™ Teflon® surface protector prevents stains from penetrating the surface of our products; keeping surfaces cleaner. Extensive laboratory testing proves that EMCO Building Products premium coatings; enhanced with the DuPont™ Teflon® surface protector, will without a doubt repel water, oils, etc., giving it an excellent lab tested repellency rating.

CoolPaint
TECHNOLOGY™

Get better home performance with ENERGY STAR Products and product enhancements. The most efficient way to achieving better energy efficient performance results is through an integrated "whole-house" approach that looks at your house as a system according to energystar.gov. This means every improvement made that reflects or qualifies as ENERGY STAR will make a difference while protecting the environment. EMCO Building Products premium collections are coated with an ENERGY STAR compliant paint finish making EMCO Building Products' steel siding exteriors perform better than other siding products on the market. Our coatings also contain Cool Paint™ Technology. This advanced coating is designed for superior energy performance by using reflective pigments in the paint to help reduce the energy consumption.

Worry Free

EMCO Building Products steel siding and accessories are virtually maintenance-free. Just the casual rinse from your garden hose will keep your siding exterior looking beautiful and clean. You'll never have to paint or stain your home again.

Warranty Tough

To give you added peace-of-mind, EMCO Building Products backs its EMCO Preserve and EMCO Weatheredwood steel siding with a “no nonsense” limited warranty, which includes a thirty-five year chalk and fade, and we even offer a fifty-year hail protection.

Steel is the world's most recycled material.

Ninety-five to one hundred percent of steel is recycled globally and the life expectancy is far greater for steel products compared to most other materials such as vinyl, wood or fiber cement. Steel siding is 100% recyclable at the end of a long useful life; and on job-sites, steel and aluminum material waste is easily separated and recyclable. We strive to manufacture products that promote a healthier environment for all. From the stringent eco-guidelines followed by our paint line to our commitment to using recycled steel, EMCO Building Products keeps moving forward with the environment.

Recycling steel and aluminum on a job-site is also compensated by the value given when recycling. In addition, due to the credible long life and documented durability, steel siding makes an attractive investment not to mention it is aesthetically pleasing. EMCO Building Products is focused on promoting and supporting our environment in all that we do. We are committed to finding ways that we can lead the industry in reduced environmental impact.
